Version 1.1

This is a separate installation package which provides “Email To Text” functionality with following capabilities:

Email to Text add-on Package does not support incoming notification feature for ‘Last Sender’ of sender ID.

1. To configure email forwarding and verification via UI.
2. Use the functionality without email forwarding process involved [By directly selecting ‘Reply To’ address].

For detailed configuration steps, please click here.

- To enable Email to Text notification with addon package, you must disable “Notification on Incoming” option given in SenderID and Assignment section under Converse settings.
- This package can be installed on any SMS Magic package version greater than or equal to 1.52.
