Overview

The Message Delivery Dashboard is built for quick access to statistics and information related to messages sent and received. This helps in keeping a track of all messages in one place with visual depictions and statistical information.

The information in the Dashboard can be filtered using the filter drop-down as shown below:

FILTER	DESCRIPTION
Last 24 Hours	Displays hourly information for the last 24 hours
Last 7 Days	Displays daily information of the last 7 full days
Last 15 Days	Displays daily information of the last 15 full days
Last 30 Days	Displays daily information of the last 30 full days
Custom Dates	Displays information as per date range set

There are 6 different widgets in the Dashboard:

1. Messages
2. Delivery Success
3. Inbound Messages
4. Outbound Messages
5. Delivery Errors
6. Undelivered Messages
