Contact Name Not Displayed for Incoming Messages

Issue Scenario

User is unable to view the contact name while viewing the relevant conversations on the converse desk.

Possible Causes

- 1. The lookup field is not populated on the incoming SMS record.
- 2. The object field is not populated on the conversation record.
- The SMS was received from an unknown number

Solution

Follow the given procedure to resolve the issue:

- 1. Verify and assign appropriate permissions for the user.
- 2. Index the the Mobile field on the SMS History record if it is not indexed.
- 3. Populate the object type field on the conversation record, if required.
