Assign a Permission Set

The Permission Sets are preset by SMS-Magic while the Custom Permissions are customized permissions based on the requirements of the user's organization.

Assign these permission set to users to provide access to SMS-Magic Objects.

Available Permission Sets:

SMS Converse Conversation User: Provides permissions for objects and fields to users required to send messages using SMS-Magic converse.

SMS Converse Template Author: Provides permissions for objects and fields to users required to edit and create SMS-Templates using SMS-Magic Converse.

SMS Converse Permission Set: Superset of the above-mentioned Permission Sets. Provides permissions for all the objects and fields to use SMS-Magic Converse, Recommended for Admin Users.

To manage permission set assignments to users, follow the instructions at Manage Permission Set Assignments.
